

ManageWyse Enterprise Topology For Time Attendance and Access Control

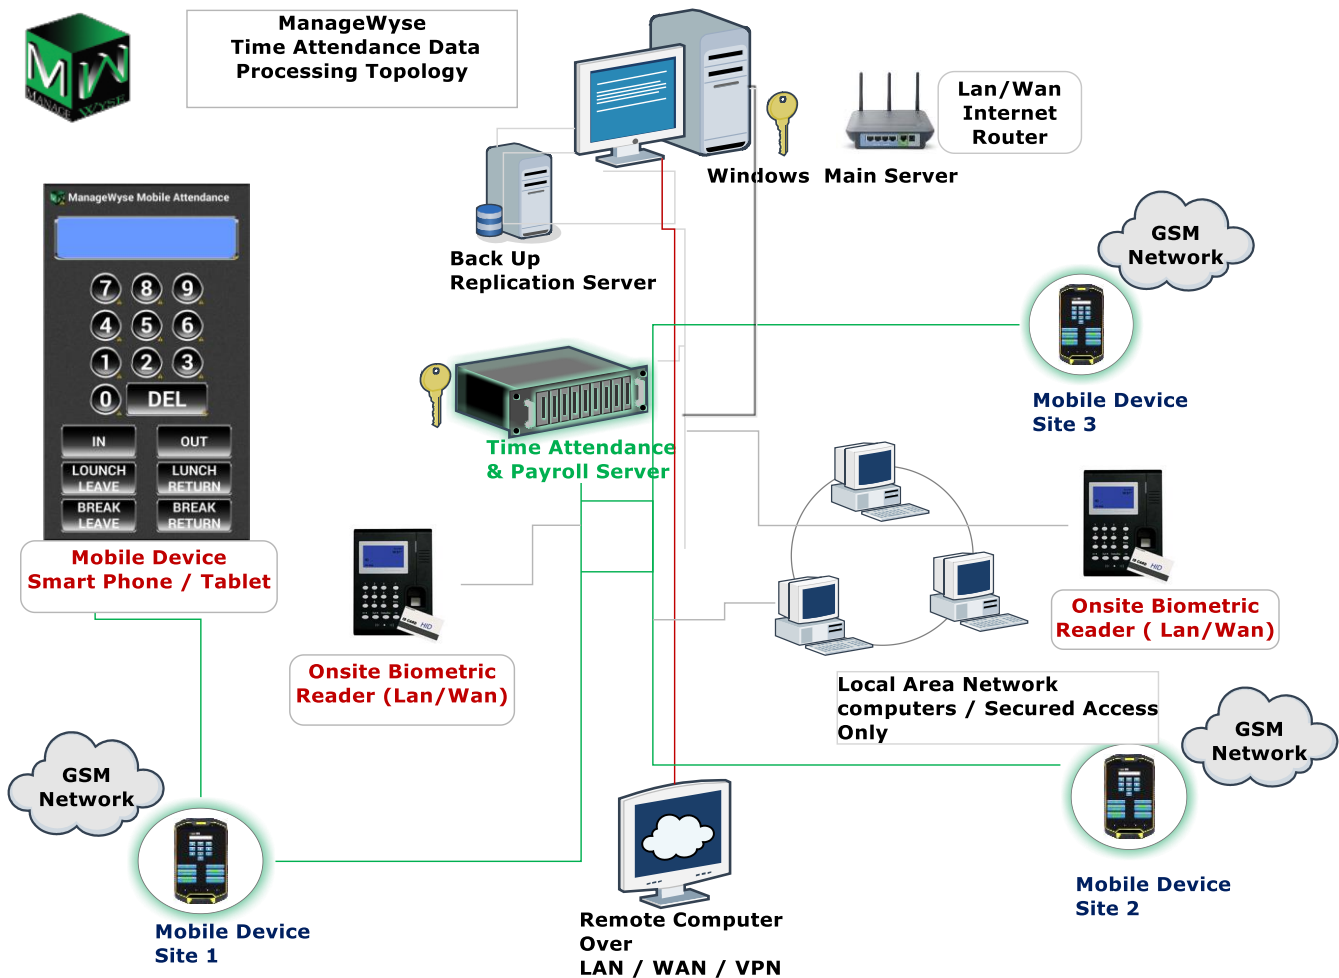

Fig 1.0

Introduction:

This system is unlike most systems that exist in the desktop and mobile workforce market, we have further engineered our technology to take advantage of the growing workforce environments in both private and governmental entities.

Our regular Biometric Finger Print Reader Captures Employee Finger-print Data, this Reader can be permanently mounted at all physical locations island wide.

Our mobile application runs several mobile platforms which includes Android and iOS, all of which runs on both Tablet and Smartphones, below list just some of the rich features our technology supports.

Main Features:

- Centralized access to all Time Attendance reports
- Eliminate buddy punching with our Biometric finger print reader
- Manage work hours for proper payroll processing with authorization features
- Employees In. Out, Lunch and Break times are captured
- Punches are uploaded to the ManageWsyse Time Attendance Server in **Real-Time**
- Geo- Location Tracking to review location of sites and/or employees punch site
- Works across LAN/WAN and Internet connection

Fig 2.0

Google Map feature for easy viewing of employees punch zones across the island in real-time.
